

5300 South

5300 South and College Drive

 **IMPROVED**
by UDOT

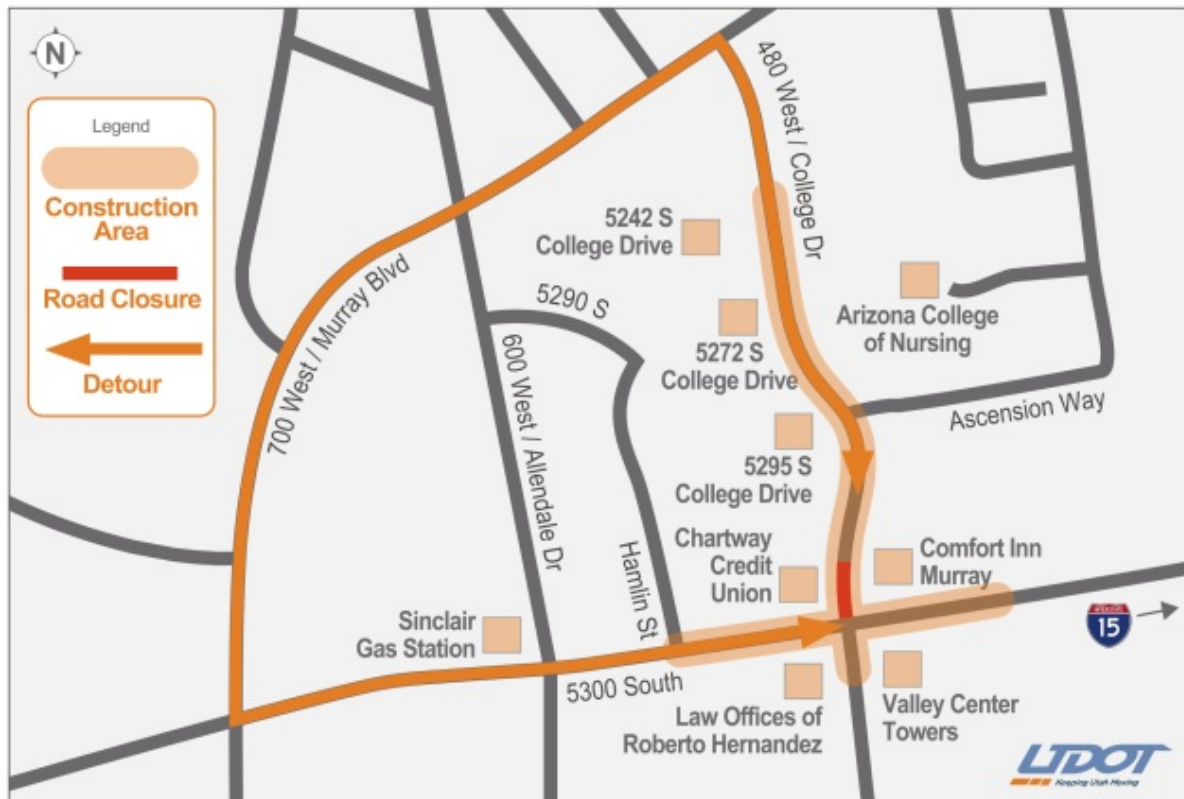

June 20, 2023

Project Overview

The Utah Department of Transportation (UDOT) and Murray City are working together to improve safety and traffic flow at the intersection of 5300 South and College Drive. This work will include widening both 5300 South and College Drive, adding an additional left-turn lane and a right-turn-only lane on 5300 South and an additional left-turn lane on College Drive. The project will also include new sidewalks in some areas as well as updated signals for the intersection.

Project Activities*

- **Beginning June 22, crews will close College Drive at 5300 South (the north side of the intersection) for 35 days to widen the road. During this closure, motorists will be detoured to 700 West/Murray Boulevard to access College Drive. See map below.**
- Sunday, June 25, as early as 7 a.m. crews will be switching over power to the new traffic signals at 5300 South. During this work the project will be using police officers to control traffic while the signals are off. Motorists are advised to pay attention to all traffic control and the officers.

Impacts will include:

Lane closures, traffic shifts, access limitations as well as a planned 35-day closure of the north side of 5300 South at College Drive. During this closure, drivers will be detoured to 700 West/Murray Boulevard and then to College Drive. **Access to businesses along College Drive will always be maintained.**

A dedicated public information team is available to answer questions or concerns you may have through the duration of construction. If you are interested in joining our mailing list to receive weekly construction activity updates, please reach out to our team at the contact information below.
